

If LPFM stations were allowed to take precedence over regional and national stations, I would lose a stations I actually am willing to contribute to in support. K-love is a network of commercial free Christian music that can do this because they are a national station with local features, which lowers the cost to make it commercial free. They provide positive music, news reporting that is suitable for families. It also serves people by offering pastoral counseling, referral to local churches, local support for ministries all around the country and a prayer network as well. Please do not take the right to enjoy stations such as these from those who enjoy them just because they do not have specific local ties. In this case K-love has provided services no local station is providing in most of the areas they serve.
